

Please do not implement any proposal that would lessen Indiana's Telephone Privacy Law Protections!!! That protection has helped my home so much as we have two disable people that live in our home and another person in our home that goes to bed very early because of going to work very early. With the Indiana Telephone Privacy Law we do not have to go in pain to answer the phone for just some compay that sells something that we don't need or want! With the Indiana Telephone Privacy Law we do not have to wake-up and get out of bed at 8 PM each night to answer the phone for companies selling "junk"!! If we want "junk" we'll call them and not the other way.

Please keep the Indiana Telephone Privacy alive as it works so well!! We now can enjoy and keep our private home private. Please don't take it away!! Thank you!!
